

**Benjamin Lam**  
D.O., F.A.C.O.S.,  
F.A.C.S.

Dr. Benjamin Lam is the Medical Director for Oxygen Oasis Hyperbaric Wellness Center. He is certified in Hyperbaric Medicine and has 17 years of Advanced Wound Care experience. Dr. Lam received his medical degree from Des Moines University

(formerly University of Osteopathic Medicine and Health Sciences) and completed a general surgery residency and plastic surgery fellowship at the Philadelphia College of Osteopathic Medicine. Double board certified in General Surgery as well as Plastic and Reconstructive Surgery, Dr. Lam is a fellow of the American College of Osteopathic Surgeons, American College of Plastic Surgeons, and the American Academy of Cosmetic Surgery.

**Victoria J. Bliss-Calkins**  
President & CEO

Victoria is the founder, President, and CEO of Oxygen Oasis Hyperbaric Wellness Center. She received her B.S. degree from the University of New Hampshire. After her 32-year career as an international sales executive in the high-tech industry,

she departed to start Oxygen Therapurity, LLC, (O2TP). O2TP was established to make Hyperbaric Oxygen Therapy more widely available to the medical community through a unique and affordable partnership. After launching successful partnerships with hyperbaric facilities, the next step was to open and operate her own facility.

Victoria is a member of the Bucks County Business Association, Delaware Valley Veterans Consortium, and Professional Women Business Network. She is a nationally registered EMT with certifications in Hyperbaric Medicine and Facility Safety.

Oxygen Oasis Hyperbaric Wellness Center is the first free-standing Advanced Wound Care and Hyperbaric Oxygen Therapy (HBOT) facility in PA to offer hyperbaric treatment in both multiplace and monoplace hyperbaric chambers, giving patients the choice of receiving treatment sitting up in a group setting or lying down in a single chamber. As a free-standing facility, we can treat a spectrum of diagnoses, including but not limited to autism, cerebral palsy, stroke, traumatic brain injury (TBI), post-traumatic stress (PTS), concussion, multiple sclerosis, neuropathy, Lyme disease, rheumatoid arthritis, fibromyalgia, migraines, RSD/CRPS, sports injuries, Crohn's disease, colitis, substance recovery, cosmetic surgery effects, nonhealing wounds, radiation injury, and compromised skin grafts and flaps.

Studies show a relaxing, peaceful environment can be instrumental in the healing process. That's why we've created a soothing environment that's conducive to effective treatment. By combining a state-of-the-art wound care/hyperbaric center with a soothing environment run by caring physicians and staff, we provide maximum peace of mind for patients. Upon entering our center, patients immediately notice how different it is from other treatment environments. From the visually appealing, spa-like setting to our warm, compassionate staff, every aspect is designed to create a calming treatment atmosphere conducive to healing.

Oxygen Oasis adheres to all hyperbaric industry standards to provide a safe, comfortable environment and experience for all patients. All treatments are administered under the supervision of our physicians and a well-trained staff of certified hyperbaric and wound care technicians.

Our Advanced Wound Care specialists take pride in providing modern, innovative, evidence-based wound management. Every patient receives a comprehensive, individualized wound care program, including debridement, dressing changes, and/or bioengineered skin substitutes, when needed.

Oxygen Oasis has been accredited by the Joint Commission, the premier health care quality improvement and accrediting body in the nation by meeting all its high standards for quality and safety.
